

To Whom It May Concern,

I would like the FCC to reject the NAB's petition 04-160. Just as I feel we should be able to receive local channels over satellite TV (and we can) I feel we should be able to receive local stations and information over satellite radio. The sound quality is much better and more information is provided ... ie. information giving title and artist of songs no longer provided verbally over standard radio. In the case of severe weather and terrible traffic due to accidents etc., it is a public service to provide this information from as many sources as possible to reach the greatest number of people in the least amount of time. This may save lives and will certainly save people time and money. Please reject the NAB's petition.
